Recess Size	: Foam blockout method 247x147x65mm Steel box method 307x207x75mm

FFOB-522 SHALLOW FLOOR BOX

Benefits

Only 65mm deep! The natural choice where a small shallow floor box is required.

Outlet capacity is two single autoswitch power and two RJ type data/voice mechs.

Ideal for use within shallow screeds over pre-tensioned concrete slabs or where being cut into existing floors.

The load tested* moulded polyamide lid and frame measures only 160x260mm.

A robust cable outlet flap allows cords to safely exit the box with the lid closed and incorporates a neoprene dustguard and a strong fully recessed stainless steel handle.

Installation Features

Outlets mount on an angle within the box to minimise dust accumulation and to allow plugs to be inserted with ease.

Outlets are shrouded within clip-in apparatus boxes with strain relieved rear cable entries.

Lid features an 8mm rebate for carpet or vinyl floor covering to infill. Deeper lid rebates are available to order.

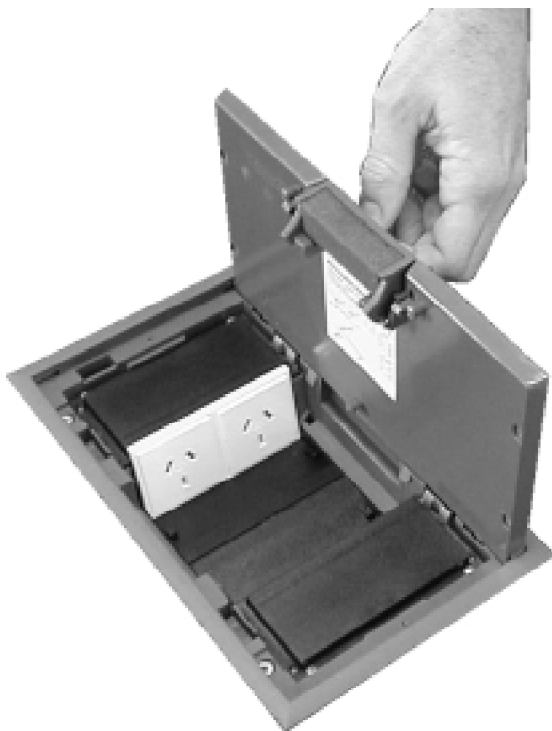

The lid is reversible to accommodate changes in room layout and is designed to gravity close.

Colours

Standard colour is Grey (RAL 7011 Iron Grey) with brown, beige and black available to order. (Minimum quantities, manufacturing lead times and extra charges may apply).

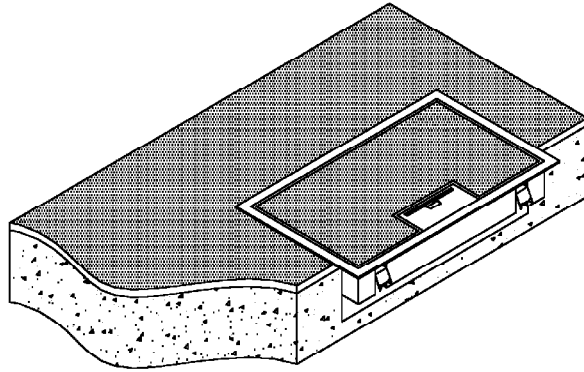

*VDE 0634 "Ducting and trunking and their accessories for underfloor electrical installations."

VDE is the Association for Electrical, Electronic and Information Technologies (Germany).

Part Number Description

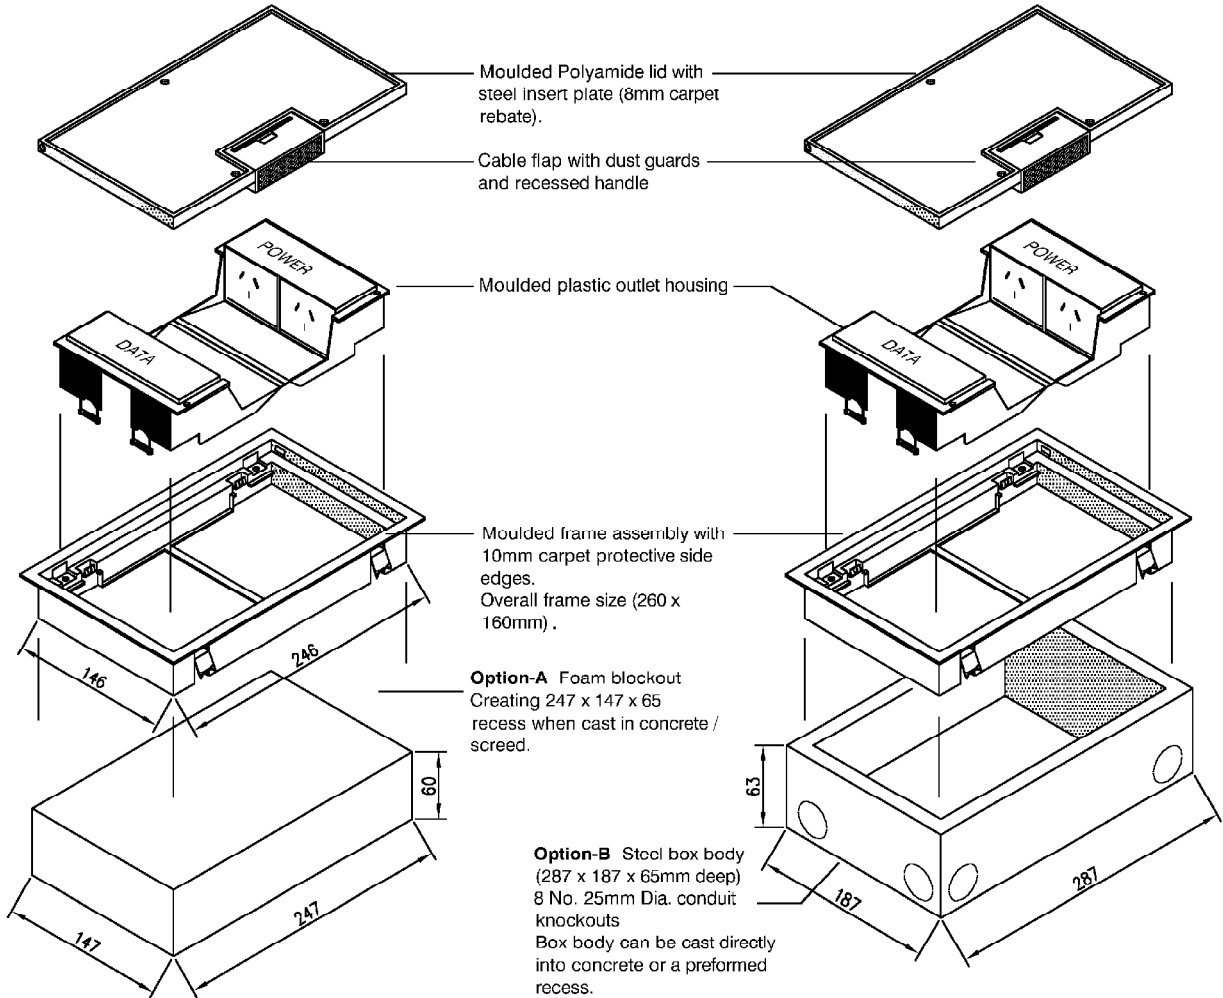

FFOB 522	Electraplan shallow floor box (2 gpo & 2 data mech type)
522BF	Cut to size foam blockout to suit FFOB-522
