# FFOB-540 DEEP COVER FLOOR BOX

## Benefits

Features a 22mm deep lid rebate for thick timber, tile or stone floor coverings (not suitable for use in wet areas).

Outlet capacity is a maximum of two standard double power outlets and two data/voice plates (Max 6 gang).

The load tested\* moulded polyamide lid and frame measures 235x235mm.

The frame has flush side edges designed to be installed level with the finished floor.

A robust cable outlet flap allows cords to safely exit the box with the lid closed and incorporates a neoprene dustguard and a strong and fully retractable stainless steel handle.

## Installation Features

Outlets are mounted on an angle within the box to minimise dust accumulation and to allow plugs to be inserted and withdrawn with ease.

The lid is reversible to accommodate changes in room layout and is designed to lift out and lay in (not hinged).

## Colours

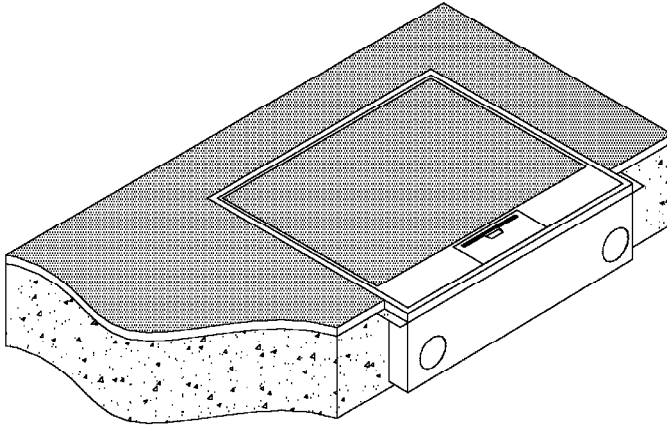

Standard colour is Beige (RAL 1019 Grey Beige) with brown, grey and black available to order. (Minimum quantities, manufacturing lead times and extra charges may apply).
